# MULTI-PURPOSE STORAGE SOLUTIONS

## Commercial

- Retail units
- Storage
- Showrooms
- Temporary factory / Production space
- Office facilities (large open plan)
- Car showrooms
- Long-duration exhibitions

## Education

- Temporary classrooms
- Storage
- Gymnasiums
- Cover for sports facilities (5-a-side pitches, ice rinks etc)
- Changing rooms
- Available to hire or purchase

## Industrial

- Storage and warehousing - with high eave heights
- Buildings can accommodate internal forklift operation comfortably
- Facilitate space-saving racking systems
- With spans extending to 20m
- Ideal for the access and loading of large vehicles under cover
- No foundations required
- Fully permanent or relocatable

## Equestrian

- Bright, fresh & spacious riding arenas
- Full PVC roofing provides an excellent natural light source for both the horse and rider
- Clear-span riding area - widths up to 20 metres
- The ability to ride year-round
- Versatility of the building from riding to stabling
- Costs less than a traditional building
- Designed to withstand the most severe weather storms

Costs less than traditional warehousing

Our solutions are suitable for tarmac, grass, concrete or hardcore

# PROFESSIONAL SERVICE & ADVICE

**Instant Space was created as a direct result of the increasing demand for temporary storage structures from its sister company Blithfield Events.**

Instant Space structures reach beyond the features of traditional buildings, providing outstanding value for money and benefits unachievable with traditional alternatives.

We pride ourselves on being able to offer high quality products with an emphasis on exceptional service. Our units are a cost effective and versatile alternative to traditional buildings and warehousing.

As part of our service we provide a free site visit and survey, fast quotation service and structures ready to use within weeks.

**Bespoke sizes, designed and built to your exact specifications**

- Free site visit & survey
- Fast quotation service
- Costs less than traditional warehousing
- Infinitely extendable and easily relocatable
- Quick to install - rapid turnaround from first phone call to installation
- Installed on almost any type of ground with no need for foundations
- Bespoke sizes, designed and built to your exact specifications
- A choice of width, height and length to optimise your usage
- Flooring, heating and lighting to suit your requirements
- Designed for fork truck and vehicle access.
- Designed to withstand the most severe storms
- Support available 24 hours a day, 7 days a week
- Fully permanent or relocatable.
- Only one months notice required for termination of hire contract

# HIRE OR BUY A SOLUTION

## HIRE A SOLUTION

### Benefit from No Large Capital Outlays.

All the standard halls can be rented from Instant Space at attractive rates and with the same level of individuality as when you buy. At the end of the rental period, you can decide whether to continue renting the hall, disassemble it or take over ownership. One months notice is required for termination of the hire contract.

## BUY A SOLUTION

### Generate Value From Unused Space and Avoid Expense of Off-Site Leasing.

Our units are a cost effective and versatile alternative to traditional buildings and warehousing. Many of our clients have seen large savings in expenditure by keeping all their activities on one site rather than renting off site space which can be an inflexible and expensive alternative to an Instant Space structure.

- Quickly increase activity for less cost
- No large capital outlay
- Take control of expenditure
- Don't disappoint customers
- Allocate payments into monthly budgets
- Save on business rates
- Avoid costly off-site leasing
- Generate value from unused space
- Capitalise on demand before competitors
- Avoid long-term binding commitments

**Support available  
24 hours a day,  
7 days a week**

Designed for fork truck and vehicle access

Storage solutions from Instant Space can be operational within 48 hours

# EFFICIENT DESIGN & CONSTRUCTION

## Coverings:

The translucent PVC coated roof covers we use allow natural light into the structure. They are made from a PVC-coated fabric, with high gloss varnish and are flame retardant.

Roof available in white or translucent.

## Walls:

PVC coated wall sections (hard or soft) and solid steel sides offer higher security level.

Walls available in brown or white.

## Doors:

Appropriate lockable doors are available offering extra security in all applications.

Walk through door or double door.

## Windows:

Display windows with laminated glass.

## Gates:

**Tarpaulin Sliding Gate** - In the gable end or the side wall

**Sliding Gate** – in the gable wall or the side wall (Single or double leaf)

**Sectional Gate** - with chain-hoist drive or electronically operated

**Rolling Gate** - rolling cladding made of galvanised steel or aluminium, electronic

## Eave Heights:

Structures with high eave heights are available, allowing, for example, for space-economic racking systems.

## Ground Fastening / Anchorage:

Our structures do not need any foundations - site preparation (and thus cost) can be kept to a minimum.

## Structural Integrity:

Our structures have wind and snow loading static calculations, to withstand extreme wind and weather conditions.

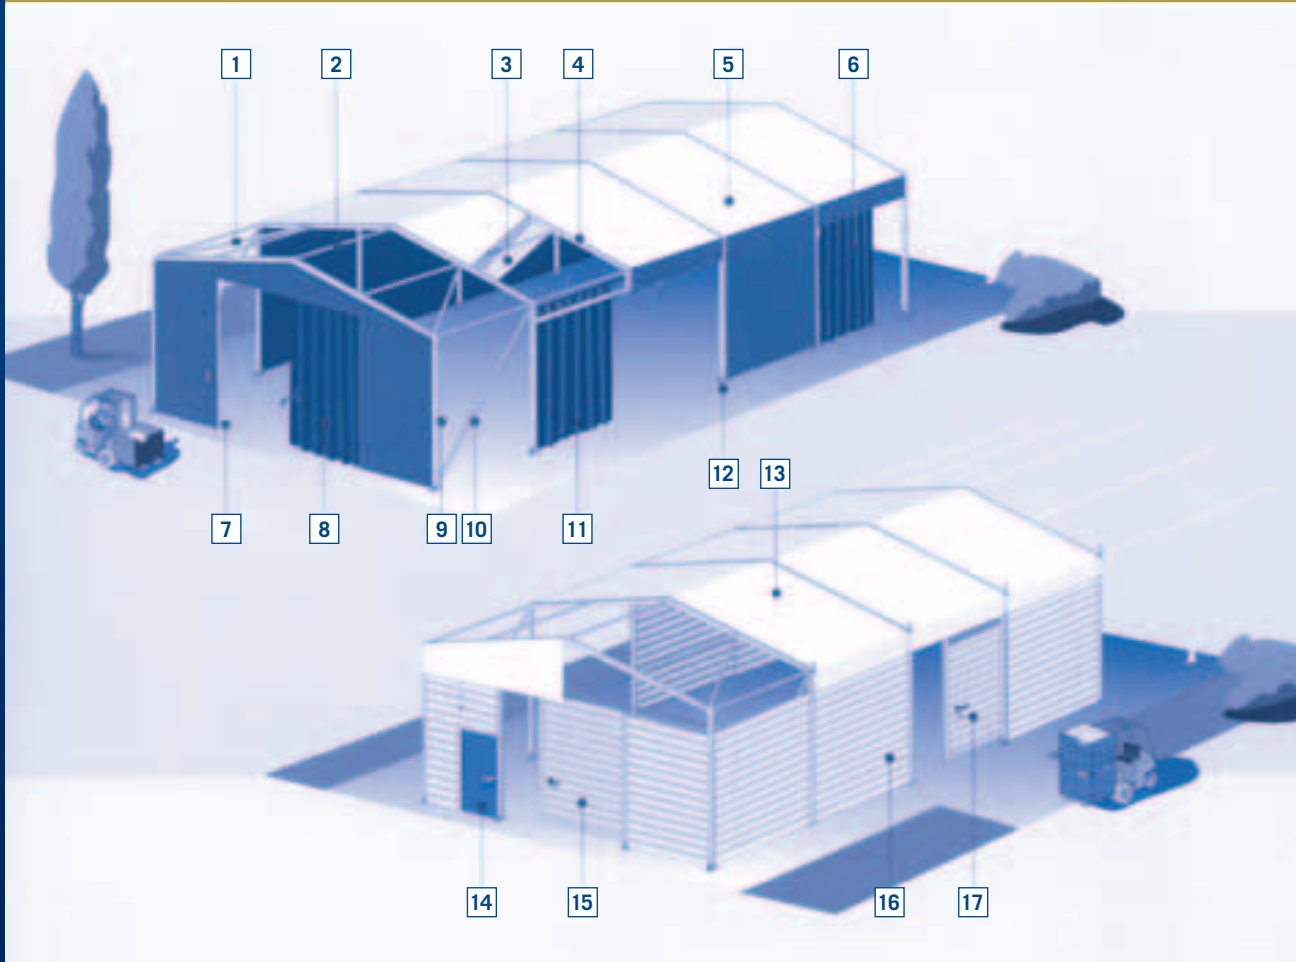

**Our structures do not need any foundations**

- Ease of erection and re-locatable properties make temporary structures a value option
- Total flexibility of application - modular design allows for most requirements
- High eaves for economic storage
- Unlimited lengths and Configurations
- Robust steel-sided buildings
- Quick response & delivery times
- Extensive choice of span sizes, typically 3m - 25m, but wider if required
- Insulated options available
- Totally dismantlable and relocatable / transferable
- Translucent PVC coated roof membrane, which is quick to install and allows external natural light in
- No need for foundations
- Choice of access doors, from fire exits to roller shutters

# HOW DOES IT WORK?

## DESIGN AND CONSTRUCTION OVERVIEW

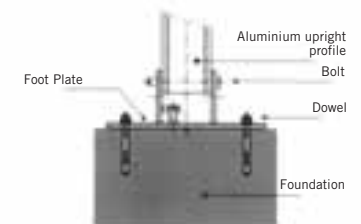

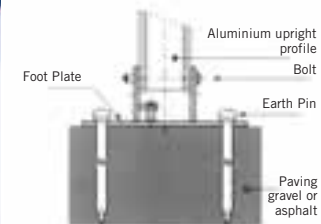

### WHAT IS AN INDUSTRIAL STRUCTURE?

An aluminium framework is covered with a tarpaulin made of translucent, PVC-coated fabric. An advantage of these lightweight halls is that they can be set up without a foundation. The easy-to-assemble design and the prefabricated system parts, guarantee extremely quick assembly. Relatively small halls can be set up without a fork-lift truck - and even with the large variants, a crane is very rarely needed.

1	Roof diagonal	10	Wall diagonal
2	Purlin	11	Wide side wall gate
3	Interior tarpaulin	12	Ground securing
4	Truss	13	Roof tarpaulin
5	Roof/Wall tarpaulin	14	Walk through door
6	Narrow side-Wall tarpaulin gate	15	Gable wall sliding gate
7	Gable wall upright	16	Trapezoidal sheet
8	Gable wall tarpaulin gate	17	Side wall sliding gate
9	Upright		

### GROUND SECURING

Storage solutions from Instant Space are fully permanent or relocatable
